Code Style

- All tabs are equal to two spaces.

- Single tag HTML elements do **not** contain slashes. Example:

  ```
  NO
      <img src="some-image.png" />
  Yes
      <img src="some-image.png">
  ```

- HTML elements that contain text content appear on one line. Example:

  ```
  <span> Some text </span>
  ```

- HMTL elements that container other HTML element appear on multiple lines. Example:

  ```
  <div>
      <p> This is some text</p>
  </div>
  ```

- When writing CSS styles, the opening bracket is on the same line as the selector and the closing bracket is on a line by itself at the same indention as the selector. Example:

  ```
  .css-selector {
      property: value;
      property: value;
  }
  ```

- CSS selectors are made up of lowercase letters and dashes. Example:

  ```
  .this-is-a-css-selector
  ```
